The application has been amended as follows:

Please cancel claims 2 and 34-38.

Please replace the following claims:

1. (Currently amended) A computer-implemented method of managing market information, comprising the steps of:

(a) electronically receiving with a computer system data including confidential information regarding market participants, wherein said data regarding market participants comprises data regarding a first market participant and a second market participant;

(b) electronically receiving with said computer system an electronically executable order and targeting parameters from said first market participant;

(c) electronically receiving with said computer system confidential trading interest information from said second market participant;

(d) identifying said second market participant as a market participant that is most likely to take a contra side of said electronically executable order and as unlikely to use information regarding said order in a manner that would affect the price or availability of said security, wherein said step of identifying is based, at least in part, on said received confidential information regarding market participants; ~~and~~

(e) routing said electronically executable order to said identified second market participant without revealing said first market participant's identity or other confidential information regarding said first market participant to said second market participant, and wherein no information regarding said second market participant or said confidential trading interest information received from said second market participant is transferred to said first market participant; and

(f) producing a targeted dissemination list of market participants based, at least in part, on said received confidential information regarding market participants and said order and targeting parameters, and wherein the step of identifying a second market participant that is most likely to take a contra side of said order is based on said dissemination list.

14. (Currently amended) A method as in claim 2- 1, wherein the step of producing a targeted dissemination list of market participants based on said stored data regarding market participants and said electronically executable order and targeting parameters is based on relations between said stored data not known to said first market participant.

17. (Currently amended) A method as in claim 2 1, wherein the step of producing a targeted dissemination list of market participants based on said stored data regarding market participants and said electronically executable order and targeting parameters is based on data that is not available to any individual market participant, and wherein said step of producing a targeted dissemination list comprises aggregating data provided by a plurality of market participants.

18. (Currently amended) A method as in claim 2 1, wherein the step of producing a targeted dissemination list of market participants based on said stored data regarding market participants and said electronically executable order and targeting parameters is based on data that is not available to any individual market participant, and wherein said step of producing a targeted dissemination list comprises comparing data provided by a plurality of market participants.

25. (Currently amended) A method as in claim 2 1, further comprising the steps of:
(c) ranking market participants on said targeted dissemination list in order of likelihood of taking the contra side of said electronically executable order; and
(d) if said identified second market participant does not execute said electronically executable order, successively routing said electronically executable order to the remaining market participants on said ranked targeted dissemination list, in order of likelihood of taking the contra side of said electronically executable order, until said electronically executable order is executed.

31. (Currently amended) A method of managing market information, comprising the steps of:

(a) electronically receiving with a computer system data including confidential information regarding market participants;

(b) electronically storing with said computer system said received data regarding market participants;

(c) electronically receiving with said computer system an order-related query from a first market participant;

(d) based on said received data regarding market participants, calculating with said computer system an estimate of a probability of execution if the order were routed to market participants based on said query; and

(e) electronically reporting with said computer system said probability to said first market participant.
